

CuttingEEG 2021

Poster Submission form (subject to slight modifications)

Poster submission

We have completely redesigned the way we were approaching posters. You should consult our website: <http://cuttingeeg2021.org/poster> before filling in the following fields.

Note: This application is restricted to the attendees to show their academic work. To display posters with industrial or general research projects please contact us directly (contact@cuttingeeg.com)

Poster title *

Your answer

format: Smith, A (1), Jones, KC (2, 3), Wilson, S (1, 2)

Your answer

Affiliations *

Format: (1) Lab, Institution, City, Country; (2) Lab, Institution, City, Country

Your answer

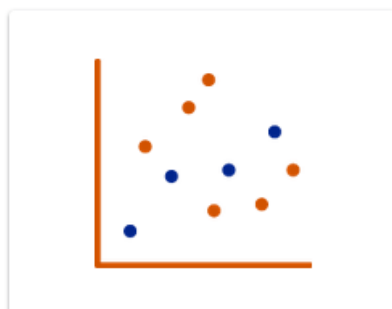

Type of submission

Planned study

Collected data study

Analysed data study

Planned study

At the time of submission the study is planned (i.e. protocol, pipeline ...). This plan may be refined by the time of the conference but no data should be collected before the conference.

Submitting a Planned study implies filling the "Rationale" box below before the submission deadline. The "Detailed material and methods" box will not be reviewed and can be modified until shortly before the conference.

Upon abstract acceptance, the status of the submission will be "accepted pending detailed material and methods submission". This will be checked before the conference in order to give the "accepted" status to your poster abstract.

PLANNED STUDIES (i)

At the time of submission your study is **planned** (protocol, projected analyses...) and you may refine it for the conference **but not yet implement it.**

Rationale *

In this section, please describe the theoretical background, the experimental methods and the analysis that will be used. This section is mandatory and cannot be revised once the submission deadline has passed. 2000 characters max.

Your answer

Detailed material and methods

In this section, please describe in detail all planned analyses. It is meant to prefigure a preregistration report. Recommended information to include: experimental design, planned sample size with power analysis, methods used, analysis plan, statistical tests etc. so as to foster constructive feedback during the conference. This section is required for the final acceptance but it will not be evaluated and may be edited until shortly before the conference. 4000 characters max.

Your answer

Collected data study

At the time of submission the data has been collected, and may be partially/fully analyzed by the time of the conference.

Submitting a Collected data study implies filling the "Rationale" and the "Material and methods" boxes below before submission deadline. The "Results and conclusion" box will not be reviewed and may be modified until shortly before the conference.

Upon abstract acceptance, the status will be "accepted pending results submission". This will be checked before the conference and the abstract given the status "accepted".

COLLECTED DATA (ii)

At the time of submission the data has been **collected** and you may **partially/fully analyze** the data by the time of the conference.

Rationale *

In this section, please describe the theoretical background, the experimental methods and the analysis that will be used. This section is mandatory and cannot be revised once the submission deadline has passed. 2000 characters max.

Your answer

Material and methods *

In this section, please provide information about the experimental design, data collection, and conducted analyses. This section is mandatory and cannot be revised once the submission deadline has passed. 4000 characters max.

Your answer

Results and conclusion

In this section, please describe all results and current conclusions. This section is required for the final acceptance but it will not be evaluated and may be edited until shortly before the conference. 4000 characters max.

Your answer

Analysed data study

At the time of the submission the data are partially/fully analyzed and will be fully analyzed at the time of the conference.

Submitting an Analyzed data study implies filling the three boxes "Rationale", "Material and methods", and "Results and conclusion" below before submission deadline.

No changes will be possible after submission deadline.

ANALYZED DATA (iii)

At the time of the submission the data are partially/fully analyzed and will be **fully analyzed** at the time of the conference.

Rationale *

In this section, please describe the theoretical background, the experimental methods and the analysis that will be used. This section is mandatory and cannot be revised once the submission deadline has passed. 2000 characters max.

Your answer

Material and methods *

In this section, please provide information about the experimental design, data collection, and conducted analyses. This section is mandatory and cannot be revised once the submission deadline has passed. 4000 characters max.

Your answer

Results and conclusion *

In this section, please describe all results and final conclusions. This section is mandatory and cannot be revised once the submission deadline has passed. 4000 characters max.
